## City of Martensville Water Pumphouse #1 Addition and Upgrades

---

The City of Martensville is undertaking a major upgrade to their Water Pumphouse located on the corner of 1<sup>st</sup> Street South and 6<sup>th</sup> Avenue South. These upgrades are scheduled to be completed in the fall of 2019. You are receiving this letter because you reside in an area which may be affected by the construction. A map of the construction area is detailed below.

---

### When will construction begin?

---

The scheduled start date is May 16, 2019. The contractor for this project will be Haid General Construction Ltd.

---

### How long will the construction take?

---

Construction is expected to be completed by November 15, 2019. It should be noted that due to the nature of the work being completed, the schedule is reliant on favorable weather conditions.

---

### How will I be affected?

---

During construction there will be a significant increase in traffic to/from the area. There will also be an increase in congestion from parked vehicles, equipment, and stockpiles.

---

## What can I expect during construction?

---

### Visual

You can expect to see contractor vehicles, equipment, and employees in the area. The contractor will also have small stockpiles of material and equipment stored on site.

### Noise

You may hear construction noise from power tools and heavy equipment. In order to minimize the disruption to residents, the contractor will follow the City of Martensville Noise Bylaw.

### Road Closures

Nearby roads will remain open during construction. Traffic can expect congestion and minor delays while large trucks are making deliveries.

### Parking

Residents can expect to see the amount of on-street parking reduced due to the increase in activity in the area.

### Waste & Recycle Collection

Waste and Recycling Collection will not be affected by the construction. Residents are asked to keep in mind that their bins must be a minimum of 4 feet from any obstructions.

### Hours of Operation

The contractor anticipates the hours of work for this project to be Monday to Friday, from 7:00 a.m. to 7:00 p.m. however these hours may occasionally be extended.

The City of Martensville's noise bylaw allows construction work to take place between the hours 7:00 a.m. to 10:00 p.m. Work that violates this bylaw will only occur in extreme circumstances.

### Work Place Safety

All construction activities will be completed in accordance with Saskatchewan Occupational Health and Safety regulations. The contractor also has a comprehensive safety policy in place to ensure no harm to employees, the public, property, or the environment.

Construction sites can be inherently dangerous, and we ask for the public's cooperation in maintaining a safe construction site. Please respect all barricades, and posted signage around the construction area, as well as maintaining a safe distance from the construction equipment and materials. Of importance is the safety of the children in our community. Please take the time to explain to your children how to be safe around the construction site.

---

## Where Can I Get More Information?

---

If you have any questions or concerns, please feel free to contact:
